

# ADHESIVE WEIGHT TYPE 355 2.0

## OPTIMIZED SEGMENT DESIGN

Better attachment of the weight to the rim radius thanks to the trapezoid shape segments. Higher robustness of the product.

## UNIVERSAL APPLICATION

Universal 5 kg steel adhesive weight roll with 5g segmentation for the aftermarket.

## ULTRALINER<sup>®</sup>

Maximum adhesive strength right from the start on cold, dirty or matt rims and when surface tension is too low thanks to ULTRALINER<sup>®</sup> adhesive tape.

## SPEEDLINER<sup>®</sup>

High final adhesive strength at OE level with simultaneous residue-free removability thanks to patented SPEEDLINER<sup>®</sup> adhesive tape.

## SPECIFICATIONS

### ULTRALINER<sup>®</sup>

### SPEEDLINER<sup>®</sup>

Vehicle type

Passenger car

Rim type

Alloy rim

Material

Steel (zinc plated and powder-coated)

Coating

Premium HPW powder coating in OE quality

Thickness

3,8 mm incl. adhesive tape

Width

19 mm

Segmentation

1000 x 5 g (5 kg)

Adhesive tape

Black ULTRALINER<sup>®</sup> with protruding blue protective film (finger lift)

Blue SPEEDLINER<sup>®</sup> with protruding transparent protective film (finger lift) & reinforcing film

Residue-free removal?

No

Yes

Suitability for dirty, cold or matt rims?

Very good

Limited

Suitability for high storage rates?

Limited

Very good
