

PRODUCT DETAILS

Color	black / white			transparent	Runflat
Viscosity	soft	universal	hard	soft, universal, hard	universal
Consistency	creamy, soft	creamy, medium	firm	See left	creamy, medium
Content	5 kg	5 kg	5 kg	5 kg	5 kg
Application	Best pick-up with brush easy installation due to high gliding properties For cold temperatures	Good absorption through brushes For cold to moderately warm temperatures	Economical pick-up by brush with high tire throughput Due to the high viscosity, the paste does not flow away during application and is therefore more economical In general: the larger the tire, the harder the paste should be for warm temperatures	Advantages soft, universal and hard see left Can be used very sparingly as a film former due to its high glycerine content and therefore high yield	For runflat tires and sporty vehicles Extra high gliding properties
Consumption (for how many tires?)	High	Medium	Economical/ low	See left (We recommend sparing application due to the high glycerine content)	Economical/ low
Lubricity	High	High	High	Very high	Very high
Drying behavior	Quick drying	Quick drying	Quick drying	Slow drying, transparent little residue	Slow drying (ideal for parallel processing of tires)
Biodegradable	Yes	Yes	Yes	Yes	Yes
	Chemically neutral towards rubber, steel & aluminum				
Processing temperature	-10 to +50°C	-10 to +50°C	-10 to +50°C	-10 to +50°C	-15 to +50°C
Vehicle types					

 **Perfect**[®]
EQUIPMENT

MOUNTING PASTE

MOUNTING PASTES

THREE VISCOSITIES: SOFT, UNIVERSAL, HARD

The right consistency for every application.

IDEAL FOR DISASSEMBLY

Simply coat narrow areas.

TRANSPARENT

No cleaning necessary after installation.

HIGH LUBRICITY

For easy mounting & tight fit of the tire.

VEGAN

All mounting pastes are environmentally friendly and biodegradable.
