

**THE BEST SOLUTION  
FOR YOUR BATTERY**

# LOCAL ROOTS, GLOBAL PRESENCE

## GLOBAL FOOTPRINT

We partner with leading battery manufacturers around the globe. Our battery bushings are produced and shipped from our European headquarters in Germany as well as from our United States facility. Furthermore, we offer distribution to nearly every country in the world out of our strategically located distribution centers.

## WORLDWIDE CUSTOMER BASE

HOFMANN POWER SOLUTIONS is the world market leader for cone battery bushings. We supply more than 60 customers for OE and aftermarket applications throughout the industry.

# HIGH PERFORMANCE BATTERY BUSHINGS

With unique visual appearance  
and acid proof self-sealing  
labyrinth rings.

# Excellent product design tailored to meet your demands

Our product portfolio is based on deep market knowledge and close partnerships with our customers to develop the best product for your needs. If required, our qualified development team is ready to proactively advise our customers in the preliminary stages of product development and accompany them in obtaining a tailor-made solution.

For an optimal connection between the battery bushing and the polypropylene of the battery lid we developed the advanced undercut labyrinth. This unique feature prevents acid migration through the labyrinth and helps to make the battery leakage-proof. In order to provide a shiny appearance and an improved surface finish, our battery terminals are surface treated over the entire cone area.

## Advanced undercut labyrinth

### 1 ADVANCED UNDERCUT LABYRINTH

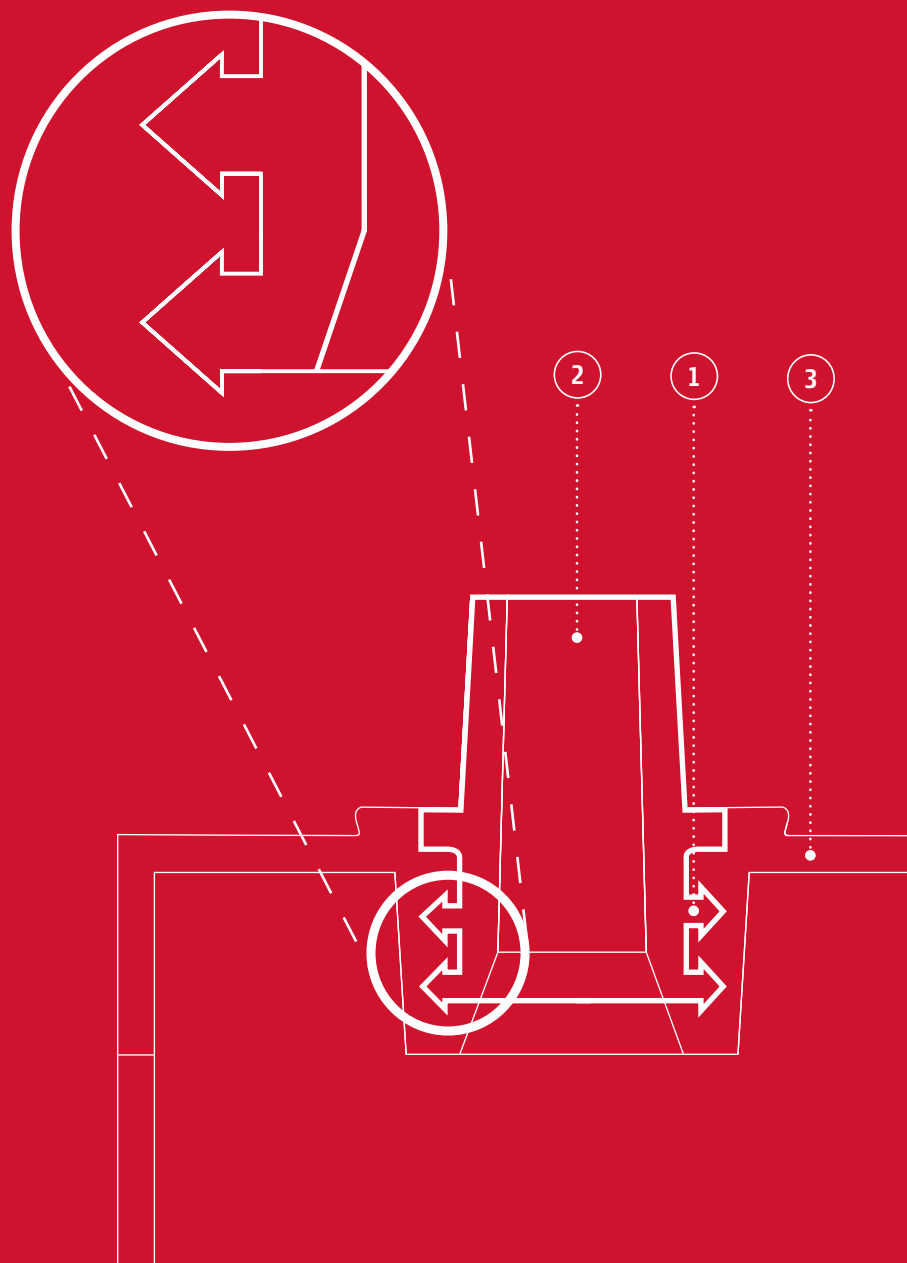

- Highest precision for superior profile
- Optimal connection between synthetic material and terminal
- Labyrinth shape guarantees best possible sealing

### 2 CONE

- Unique shiny appearance
- Improved surface finish

### 3 BATTERY LID

- Shrinking of the plastic during lid-production
- Optimal sealing between the undercut and the plastic

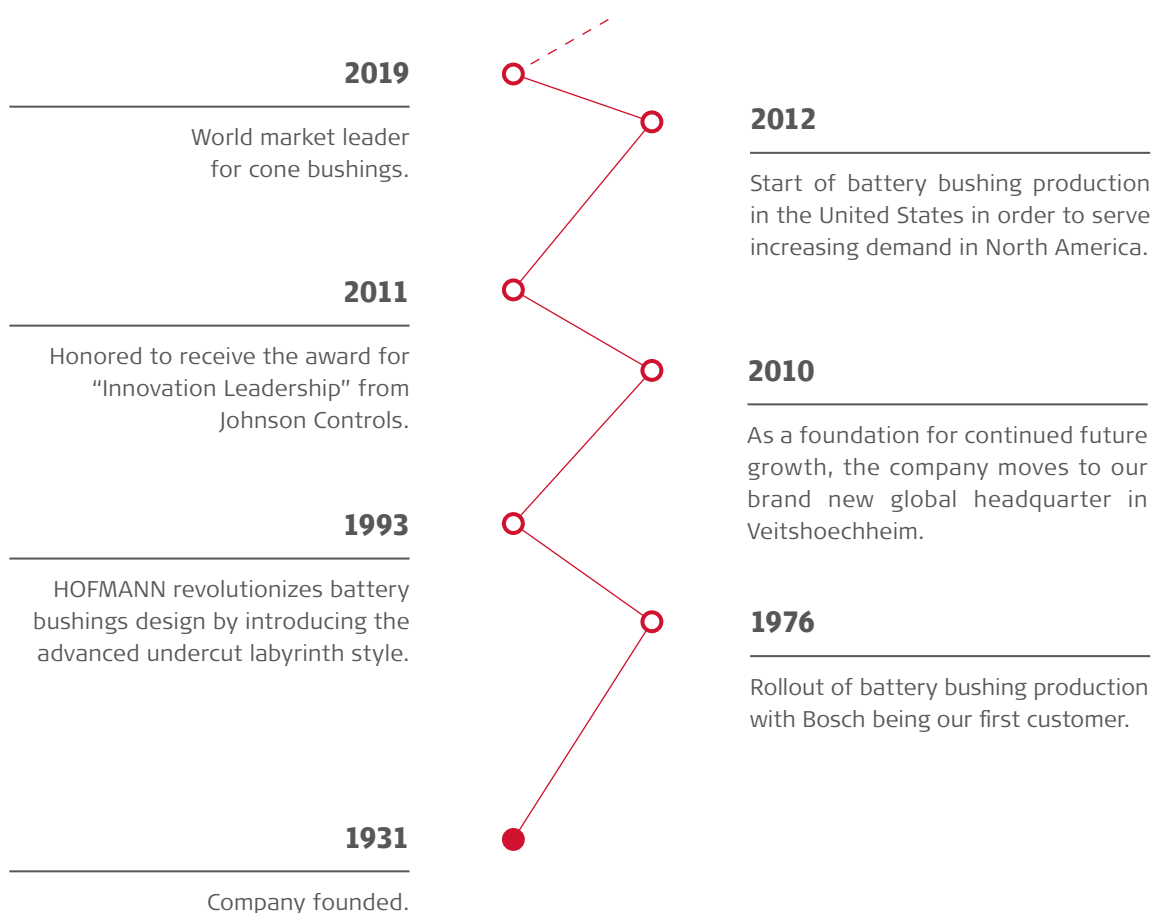

# Competence

---

Since more than 40 years we are gathering experience as a manufacturer of battery bushings that meet the highest demands of the market. As the global market leader for wheel balance weights we are also a Tier 1 supplier to many OEMs and development partner for the automotive sector. Due to these successes, we are highly familiar with what it takes to maintain an OEM-level product, including the requirements, service expectations and industry standards.

Our sound expertise enables us to accompany battery manufacturers and lid suppliers around the globe. Working closely together with our customers, we develop and produce battery terminals for diverse applications. We ensure highest quality standards guided by our engineers whilst responding to various market needs globally and locally.
